Seat Bracket Mounting Hole Measurements

Part Number(s): 690-60010 through -60120; 690-20301 through -20339
1968 - 1982 Corvette

We do not carry a standardized seat bracket kit for 1973 Corvette as the individual vehicles do not conform to specific dimensions. However, some vehicles can use brackets that were designed for other model years. Using these bracket mounting hole measurements, determine if one of the other available model year brackets will align with the bolt holes on the vehicle floor. Four of the holes need to match to ensure a fit. We recommend checking measurements for both driver's and passenger's sides.
